Homework 4 Pt 1: *Analysis and Design*

Python and Data: Analysis and Design
===========================
Visualization of data from the winter Olympic games every year.

Thesis:

> How has the Canadian women's curling team compared to the men's curling team in medal earnings for each winter Olympics games?

Steps:
1. Create a git repository for the files
2. Gather data from the sheet
3. Create filters to filter out the data that is not needed
4. Design a mockup for the final html page
5. Create a line graph within python using the matplotlib library
6. Re-arrange the information into the mockup design
